

Lettering

Uni Pin felt tips are excellent for hand lettering. With a constant ink flow, lines are regular and precise across all types of paper.

The fine and precise calibrated tip is perfect for letters and elegant lines, as well as edges and small areas of shading.

The brush tips will allow you to draw more fluid lines with a variety of creative styles depending on the pressure applied to the tip. Their flexible tip is stronger than other brush tips on the market and easy to handle, ideally suited to pressure, angles and quick drawing offering much greater control in your sketching.

The black brush tip brings intensity to drawings whilst the two shades of grey will allow you to create shade, express depth and add volume.

Different tip sizes to meet every need

- Calibrated tip 0,8mm : Ideal for precise lines, fine details and decoration.
- Black, dark grey, light grey and sepia brush tips : Perfect for shading and more fluid lines such as edges, curves and shading as well as broad and fines strokes.

Tip

To easily create broad and fine strokes, simply apply more pressure on downward vertical lines than upward lines.

Use all four colours in the pack to give volume and easily create shade and 3D effects.

SEPIA

LIGHT GREY

DARK GREY

DEEP BLACK
